

KALYAN REDDY KHANDHADI

Product Designer | SaaS | AI-Augmented Design

Hyderabad, India | +91 7893528281 | kalyanreddy2911@gmail.com | [View Portfolio](#) | [LinkedIn](#)

SUMMARY

Senior Product Designer with **4+ years of experience designing SaaS and AI products**. I work across the full product design process, from research and interaction design to usability testing and engineering handoff, often as the sole designer on a project. I'm comfortable making decisions based on both user insights and stakeholder input. In recent years, I've worked extensively on **AI-powered products, designing copilots, conversational experiences, and agentic workflows** that help users automate tasks and work more efficiently. I use AI-powered tools daily, including Claude Code, Cursor, VS Code with Codex and GitHub Copilot, and Figma Make, to accelerate prototyping, iteration, and engineering collaboration.

SKILLS

Design: User Research, Stakeholder Interviews, Information Architecture, Journey Mapping, Storyboarding, Wireframing, Prototyping, Interaction Design, Visual Design, Service Design, Usability Testing

Craft: Design systems, responsive design across breakpoints, accessibility (WCAG), icons and illustrations

AI tooling: Claude Code, Cursor, VS Code (Codex, GitHub Copilot), Figma Make, Antigravity, Claude MCP

Tools: Figma, FigJam, Sketch, Adobe XD, Photoshop, Illustrator, Miro, Notion

Code: I read and adjust HTML, CSS, and React component code with the help of Cursor and Copilot during handoff

EXPERIENCE

Senior Digital Solution Designer

Sep 2025 – Present

Divami Design Labs, Hyderabad

- Worked on **AI-driven enterprise SaaS products**, working directly with PMs, engineers, and data scientists from research through handoff.
- Mapped out the information architecture and key user flows for an **AI-powered vendor risk platform** that handles onboarding, ongoing monitoring, and compliance tracking. The manual assessment work dropped by around **95%** and onboarding got about **70%** faster.
- Shipped an invoice evaluation workflow where **ML validates customer invoices** and routes exceptions to human review, reducing manual review effort by around **30% per cycle**.
- Designed the data governance platform across **25+ responsive screens and 4 user roles**, covering proposal review, approval, and decision tracking.
- Built a reusable Claude MCP prompt library for research synthesis, spec writing, and accessibility checks, **saving 4 to 6 hours** per design cycle.

UI/UX Designer and QA Tester (Freelance)

Jul 2024 – Dec 2024

IT Tree Limited, London (Remote)

- Ran manual QA on online betting **SaaS platforms with focus on Payment and Account modules** wrote test cases, ran regression cycles, and tracked defects to resolution.
- Led integration testing for a door manufacturing platform, validating data flow across connected systems and catching cross-module bugs before release.
- Brought a **designer's eye to QA**, surfacing usability and accessibility issues that fed back into design iterations.

UI/UX Designer

Jul 2023 – Mar 2024

Krishnaag Business Enterprise (IT Tree Limited), London

- Designed an e-commerce SaaS platform and a healthcare platform end to end, from research and wireframes to high-fidelity Figma handoff.
- Ran **10+ user interviews** and multiple rounds of usability testing with **8 to 10** users per round, using findings to reshape the main user journeys.
- Worked closely with developers to make sure the build matched the design across responsive breakpoints.

UX Designer

Dec 2019 – Oct 2021

Zemoso Technologies, Hyderabad

- Built and maintained **10+ design systems used by 10 to 15 designers and engineers**, bringing consistency across 3 SaaS products.
- Designed end-to-end for a **fintech platform** payment flows, account dashboards, compliance and reporting screens. Also worked on an **AI call monitoring product** and a **virtual home renovation tool**.
- Wrote **5 design playbooks** and mentored **4 interns** on design systems, Figma, and giving feedback.

Visual Designer (Freelance)

Feb 2018 – Sep 2019

Teestory.in, Hyderabad

- Designed **12+ core screens** across the website and mobile app, including product, cart, and checkout.
- Looked at what styles were selling and designed apparel collections around them, contributing to a **27% sales** lift over the campaign.

UI/UX Designer (Intern)

Jun 2017 – Aug 2017

YuppTV Pvt Ltd, Hyderabad

- Designed interfaces across **2 OTT product modules** recognised by the team for fast iteration on stakeholder feedback.

EDUCATION

Diploma, Digital Service Design (UX Focus)2023

Brunel University London, United Kingdom

Bachelor of Design (Graphic and UI Focus)2020

Lovely Professional University, Punjab
